ProtectIQ™ | Free 30 Day Trial, \$5.95/mo.

Provides protection against viruses, malware, and malicious websites, keeping your network and devices safe from cyberattacks.

STREAMING

Some of you may already be *streaming*, some maybe wondering "What's streaming all about?" Either way, there may be questions.

Streaming is a term to describe the delivery method of receiving video and/or LIVE TV over the internet in real-time. Though it sounds difficult, it's actually pretty simple and can add to your viewing enjoyment.

How To Start

Step 1 - Have Adequate Internet Speed

How you are currently using your internet, what speed you have can now and the number of devices, or screens, you plan to stream on will determine what internet speed you need.

Step 2 - You Need Streaming Device

Streaming devices come in different forms. Smart TVs are one form as they are already equip with *some* built-in streaming apps. Another is a gaming console.

Other streaming devices include Roku players, Fire TV Stick, Chromecast that will plug into a TV to give the TV wireless internet connection to stream/ Streaming devices can be found online or a major retailer and purchased under \$50.

Step 3 - Download a Streaming App

Streaming Apps are free to download and have monthly subscription as low as \$5.99. A little bit of research and you'll find streaming apps that best suits your need.

PREMIUM WI-FI & Whole Home Wi-Fi*

Whole Home Wi-Fi* - \$7.99/month

Some households need extra help getting Wi-Fi everywhere they need.

Whole Home Wi-Fi offers just that by optimizing and extending Wi-Fi in the rooms you work or play while mitigating Wi-Fi interference.

Internet Protection Plan - \$3/month

Assurance in knowing that "help without a service call fee" is just a call away with: troubleshooting assistance, replacement of RC-owned equipment and some in-home wiring. Not all technician visits are covered. Accounts not enrolled in a **Protection Plan** are subject to a service call fee.

Service Call \$85, After hours \$110

Network Management - Included

A pro-active system which provides diagnostics and alerts to sudden changes in a network.

Voice Services

Digital Voice - \$5/month

Digital Voice is a voice-over-internet protocol (VoIP) alternative to having a landline phone, it offers the same calling features as a landline at a fraction of the price. Calling features include...**Voice Mail, Voice Mail to Email, Voice Mail to Text, Caller ID and Call Waiting.** Plus, Digital Voice **includes Unlimited Long Distance** within the continental U.S. In the case of power outage when internet is down, **Call Forward Internet Down** will forward calls from your home number to your cell phone. City and state taxes, hearing impaired and 911 charges will apply.

Landline Phone \$35/month

Traditional landline phone with the same calling features as listed above, with the *exception of Call Forward Internet Down*. Long Distance calls are additional charges and will be billed to your account. City and state taxes, hearing impaired, FUSC (varies quarterly) and 911 charges will apply.

Phone Protection Plan - \$1/month Customers may choose to disconnect any voice service at anytime.
