## RC 2023 Scholarship Deadline Is Approaching

**Applications Due March 31, 2023**

RC Technologies offers two \$500 scholarships individually awarded to two high school seniors who will be graduating in Spring 2023, who have plans to attend a technical school, college, or university, and whose parents or guardians are active patrons of the Cooperative.

Applications with the required documents for submission are judged on: local community involvement, citizenship, leadership skills with credit toward academics.

For more information on RC's 2023 Scholarship, the application and other scholarships, go online to...

**<https://www.tnics.com>, *About Us*, then *Scholarships*.**

- 17 - Happy St. Patrick's Day!
- 18 - **Corona's St. Patty's Day Parade | Sat. 18th at 2 pm** 
- 20 - First Day of Spring
- 31 - **RC Scholarship Application Deadline**

# Fiber Pedestals

Fiber-optic is *the* best way to deliver telecommunications to homes and businesses because of the superior speed in which data can be sent and received via the Internet over a fiber network.

Fiber-optic is also the **most** weather-proof mode of delivering communications with it being housed primarily underground out of the wind, rain, heat and humidity, ice, and snow.

From time to time, an above ground fiber pedestal is needed. An above ground pedestal ties a businesses' or homes' fiber-optic cable, delivering their Internet and/or other services, to the rest of the network. Pedestals are used when we are needing to splice into existing fiber and/or to work around obstacles.

Fiber pedestals can be tall, green metal boxes and a variety of pole styles. Poles can have an orange top on them. Pedestals located in *right-of-ways* and can be in ditches, near ends of driveways or on corners of roads. Knowing that, please be cautious of moving snow in these types of locations and be on the look out for pedestals buried in snow, especially if you are moving snow in an unfamiliar area.

Fiber allows businesses to operate with optimum efficiency, less "lag time" and more "up-time" for faster processing of transactions, ordering of inventory, the ability to make and receive phone calls among other operational functions. Fiber is also important to many households. More people rely on their home's internet for work to provide for their families. Kids rely on it do homework or for online education.

RC Fiber provides much more than just faster Internet, in addition to that, it provides phone service and entertainment via Digital TV (IPTV) for some subscribers, another way to receive local news and other information, like seasonal weather alerts.

Like with any utilities, be on the look out for pedestals or fixtures while moving snow and report damage right away to our office by calling (605) 637-5211.

the snow.

## RC Technologies Fiber Network is Expanding!

### Rural Corona Area

#### Big Stone Area

Goose Isle  
SD Hwy 109  
Baily's Bay  
Henze Rd  
Rocky Point  
Togo Point  
Pelican Ridge  
Development  
485th Ave  
142nd St

### Life Doesn't Stop at the Lake

LAKE LIFE is part of your

- ☒ work life
- ☒ "movie buff" life
- ☒ gaming life
- ☒ social media life

And when it is, you want the internet to keep up with you!

Construction is planned  
and will begin  
early Spring 2023!

New and Existing customers  
must submit an application  
for fiber-optic broadband  
into RC Technologies  
to ensure your location is  
included in our fiber expansion.

Installation is included  
with service,  
sign up now to avoid costly  
installation fees later.
