## Winter Is Prime *Streaming* Time

Streaming has revolutionized the way we watch television shows and movies. With streaming, you can watch an entire seasons or series in one sitting. In the past, viewers had to wait for new episodes of their favorite shows to air each week. Viewers now have the convenience of watching as much content as they want, whenever they want. Streaming has made it easier and more enjoyable for viewers to consume their favorite video content.

Streaming is a way of lowering your bill on TV you like to watch as broadcast cable networks continue to raise their rates. It does require an initial investment of **streaming stick / device** eliminating set top boxes and their \$4.95 per month per box fee increasing the end of 1st Quarter of 2024 due to raising cost of delivering TV and a **streaming app subscription**. If you haven't started streaming and are curious on how to even begin, reach out to us, your local cooperative for support, call 605-637-5211, or make your request online. We're happy to help you through the process.

# Retransmission Negotiations Have Begun And Initial Talks Reveal Steep Rate Increases

Every three years, RC Technologies faces the very challenging task of negotiating retransmission agreements with the Big 4 Networks - ABC, CBS, FOX, and NBC. These agreements enable cable providers to distribute broadcasters' signals to their subscribers. Since the enactment of a 1992 law that allows broadcasters to set rates and charge fees, RC Technologies has fought on our behalf in these negotiations to keep these fair and reasonable.

Over the years, the landscape of broadcast television has changed with mergers and acquisitions of large media companies making them even larger and making these negotiations increasingly difficult. In addition, streaming has entered the market, which has created another dynamic in the TV landscape. RC Technologies has begun negotiations with networks. The first round of talks has revealed some of the steepest rate increases we have ever seen, with rates expected to rise significantly over the next two years, leading to higher costs for consumers.

As always, we'll update you during the process. Learn more about retransmission, goonline to [tvonmyside.com](http://tvonmyside.com).
